1.0 mm Adapter In Series

The 1.0 mm connector is a type of RF (Radio Frequency) connector that is used in high-frequency applications where a small form factor and high performance are required. It also has a characteristic impedance of 50 ohms, making it suitable for high-frequency applications up to **110** GHz.

Part No	Part Name	Frequency
70-39-0001	1.0 mm plug to plug adapter	110 Ghz

Part No	Part Name	Frequency
70-39-0002	1.0 mm plug to female adapter	110 Ghz

Part No	Part Name	Frequency
70-39-0003	1.0 mm female to female adapter	110 Ghz
