2.92 mm Adapter In Series

The 2.92 mm connector, also known as the K connector, is a type of RF (Radio Frequency) connector that is commonly used in high-frequency applications where a precise and reliable connection is required. It is also known as the SMK connector.

The 2.92 mm connector has a screw-on coupling mechanism, which provides a secure and reliable connection. It also has a characteristic impedance of 50 ohms, making it suitable for high-frequency applications up to 40 GHz.

Part No	Part Name	Frequency
80-42-0001	2.92 mm plug to plug adapter stainless steel body	40 GHz

Part No	Part Name	Frequency
80-42-0002	2.92 mm plug to jack adapter stainless steel body	40 GHz

Part No	Part Name	Frequency
80-42-0003	2.92 femm plug to jack adapter stainless steel body	40 GHz

Part No	Part Name	Frequency
80-42-0004	2.92 mm jack to jack adapter stainless steel body	40 GHz

2.92 mm Adapter In Series

Part No	Part Name	Frequency
80-42-0005	2.92 mm jack to jack adapter stainless steel body	40 GHz

Part No	Part Name	Frequency
80-42-0006	2.92 mm jack to jack adapter stainless steel body	40 GHz
